

On Saturday night the police in Sydney got a call reporting a disturbance to the peace. They drove out to discover a smashed computer on a sidewalk. When they questioned the 51 year old involved with the incident he said that he had gotten so frustrated with his computer that he threw it out the window.

No formal charges were pressed against him, however he was made to clean up the broken machine. A police spokesperson sympathized with the man, saying "Who hasn't felt like doing that?"

Before you do anything you will regret...

TRY US !

15 min. **FREE***, no obligation assessment of your Computer and Hardware. After this you decide if you want us to proceed with the suggested steps.

After the free assessment we offer:

- cleaning up hard drive
- improve performance
- system optimisation
- backup solutions
- personalized tutoring
- sales and installation of new

Hardware

Phone: 0447 025 647 or 8952 4000

* offer valid only for private Households. After the free assessment work is charged at \$ 120/hour in 30 min. blocks.
